

Stroke and Acute Cardiology Webinar

The Australasian Stroke Academy is pleased to invite you to attend a no-cost educational webinar to be presented by:

Dr Anna Holwell, ASA Council Member, General Physician and Head of Department of Medicine, Clinical Stroke Lead, Central Australia Health Service
Dr Angus Baumann, Cardiologist Alice Springs Hospital (FRACP, MBBS, BSc)

Stroke and ischaemic heart disease share risk factors in common and it is not unusual for a stroke patient to have cardiological comorbidities either prior to their stroke or arising during their stroke admission. What should the acute management of cardiac failure in a stroke patient look like in 2024? Should stroke patients be screened for coronary artery disease? How do we assess chest pain on a stroke ward and how do we interpret tests like the troponin after stroke?

Please join us for a 90 minute webinar to discuss the diagnosis and management of cardiomyopathy/cardiac failure and ischaemic heart disease in stroke patients.

Dr Anna Holwell

Dr Angus Baumann

Wednesday
April 17th

17:00 ACST / 17:30 AEST / 19:30 NZ
